WALKING ROUTES AROUND ZVIRGZDE WHITE DUNE (~3-5 KM)

The dune is located in the Zvirgzde forest, in an area managed by Latvian State Forests.

The surrounding area is characterized by unique relief, sandy hills, higher rises and falls — you can start your hike at the recreation area at the foot of the Zvirgzde White Dune, and continue along forest roads, forest trails, gravel country roads and forestry paths, enjoying the forest scenery. There is also a marked walking trail around the dune, about 4.5 km long – follow the green and white markings on the trees.

At the area you can see Kadiķu Hill, which is covered with extensive juniper groves, as well as Lake Staņķis, which was historically formed as a watermill lake.

More detailed map of roads and trails can be viewed in the LVM GEO app.

BAUSKA – VECUMNIEKI

BAUSKA - BRUKNA - STELPE - VECUMNIEKI

Travelling from Bauska to Vecumnieki opens up the diversity of the region. Along the way, you can stop by **the "Vaidelotes" family farm** to taste traditional Latvian flavours, explore the dark chapters of history at the Holocaust Memorial in **Likverteni Forest**, and discover the charm of unique local manors – this time, at **Brukna Manor**.

You can also admire the **craftsmanship of skilled local artisans** and home producers, try out your own creative talents and breathe in the fresh forest air at **Zvirgzde White Dune** – considered Latvia's highest inland dune.

For active travellers, hikers can follow the marked **St. James Way**, which runs through the scenic areas of Vecumnieki, Stelpe, Brukna, Bārbele, and Skaistkalne. Cycling enthusiasts will enjoy the experience along route **No. 402 "Rich Zemgale"**.

We also recommend planning your trip to coincide with **Vecumnieki traditional Lily Festival in July**, where florists gather to create stunning floral arrangements, alongside a bustling market, with a retro car and motorbike parade through the village.
